

Short Wave Plug-in Emitter

Heraeus offers the short wave infrared emitter with a plug in connection. This design makes first assembling as well as maintenance during production very simple.

The plug in emitter type helps to reduce maintenance costs.

Technical Data

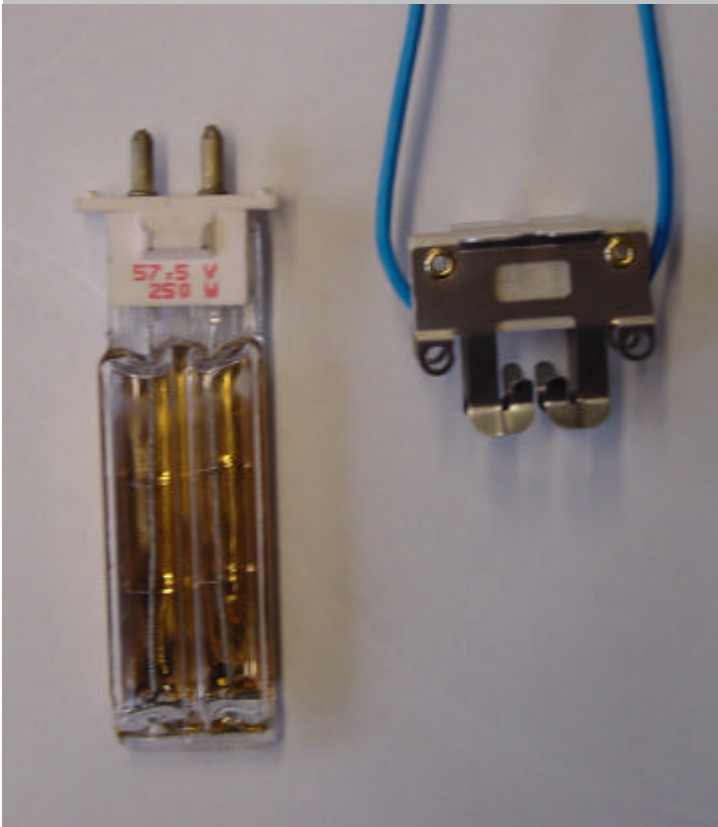

- Short wave
- Twin tube, 23 x 11 mm
- Gold reflector
- Power 250 Watt
- Voltage 57,5 Volt
- Heated length 45 mm
- Overall length 82 mm

Advantages

- simple installation
- heating up and cooling down in seconds
- transfers large amount of energy in a short time

Applications

- welding of window profiles,
- tubes,
- housings and other plastic containers
